EKSELENS · ERIO

The Risk Decision-Intelligence Layer.

Live signal → FAIR £ curves → n-tier graph → replayable audit. Above your GRC stack, not instead of it.

18 live feeds · CVE / CISA / OFAC / OFSI / UN / FSF / Companies House / GLEIF / GDACS / ReliefWeb / PHE CDR

Open FAIR Monte-Carlo · P10 / P50 / P90 £ loss curves, refreshed as signal moves

n-tier supplier graph · Tier 2-4+ via GLEIF + Companies House + optional D&B / Sayari

Replayable audit · inputs + FX + FAIR seed chained · Patent GB2613313.2

Standards readiness · DORA · NIS2 · SOC 2 Type II · ISO 27001:2022 · NIST CSF 2.0

ekselens.com/demo

13 NOV 2026 · V1.0

WHAT YOU GET IN 30 MINUTES

Live demo on your data.

A working tenant, your signals, your dependencies. No procurement cycle. No month-long trial.

Day one · working demo tenant with 142 live signals and 9 material risks.

Day two · your dependency graph ingested, concentration + sanctions overlays active.

Week one · FAIR £ curves on your top-5 risks, replay hash + QR verify.

Week two · DORA / NIS2 readiness score, 1-page board pack, Pulse edition live on LinkedIn.
